

Eurofins VOC seminar Spring 2011

- VOC regulation and labels - Seminar and forum for exchange of experience

The increasing multitude of product specifications for low emissions into indoor air are not easy to handle: LEED, AgBB, AFSSET, EMICODE, GUT, ... When do I need which stamp, and what is the best ways to achieve this?

Eurofins Product Testing A/S organises a seminar (in English), where experts of industry and testing laboratory present most recent information, and where you can receive answers to your questions:

- When do I need what?
- Which tests do I need, which applications should I send to whom?
- What are the costs?
- Are there any latest news that can be important for me?

The approach is a combination of information and exchange of experience. The plan includes extra time for your questions and for your contributions on your experience with these issues.

Participants in the seminars hold in december 2010 will receive updated information. Those having missed the december 2010 seminars will receive comprehensive information and latest updates.

Dates:

09 May 2011, 10 - 16.

Venue:

ACC Airport Conference Center, room K20, at Airport Frankfurt - opposite Terminal 1, access is one floor higher than departures area.
